

# Everything You Need to Know About CCNA

The CCNA Certification has been recognized worldwide and is highly respected by all companies. CCNA stands for Cisco Certified Network Associate. This certificate is for professionals with a networking background. This certificate certifies that the holder of the certificate has the ability to operate, configure, and troubleshoot moderate-level switched or routed networks.

## Examination format and Pre-requisites

CISCO does not require any pre-requisites to write the CCNA certification exam. Core CCNA certification exam takes 90 minutes. Below are the topics covered in the CCNA certification exam.

- Wide Area Network Design and Land Area Network Design
- OSI models
- IP Addressing
- VLAN and WLAN
- Routers/routing protocols
- Management and Security of the Network

CISCO offers additional certifications, such as CCNA Voice and CCNA Wireless, in addition to core CCNA certification. This certification will allow individuals to gain proficiency in the relevant area of computer networking.

The CCNA certification has a three-year validity. The certificate holder must retake the certification exam after three years. Because of the constant changes in technology and software updates, this is a requirement. Certified professionals may also be eligible to apply for advanced certifications like CCIE [Cisco Certified Internetwork Expert] or CCNP [Cisco Certified Network Professional].

## Eligibility Criteria

Two exams are required to receive the CCNA certification.

1. ICND1 Exam (100-101) & ICND2 Exam (200-101)

## 2. Combined CCNA Exam (200 - 120)
